Total IT Managed Support For Non Profit Organization

Solutions: Managed IT Support, Technology Asset Sourcing

EXECUTIVE SUMMARY

Frank Lloyd Wright's Unity Temple is an architectural masterpiece, embodying the bold elegance, visionary experimentation, and functional integrity that characterize modern architecture. It is considered to be among the most innovative and imaginative structures of the 20th century. In 1970, Unity Temple was designated a National Historic Landmark. Unity Temple Restoration Foundation (UTRF) was founded in 1973 by volunteers dedicated to restoring and preserving Unity Temple. Over time, the organization has evolved to promote architecture awareness and education through programs and events, introducing diverse public audiences to Unity Temple and to the design principles that inspired this iconic masterpiece.

As a non-profit organization, funding is always a challenge. Technology is typically one of the last areas to be considered during annual budgeting. This is where Keith and Azure Horizons has played a key role by delivering quality IT services within a very restricted budget.

Keith originally met UTRF's Executive Director, Heidi Ruehle-May, 8 years ago when she was the Development Manager at Housing Forward. At that time, Azure Horizons was providing the IT management and consulting services to the organization. Heidi was impressed with Keith's technical expertise and personalized service; so much so that when she joined UTRF last year, Keith was the vendor she selected to support UTRF.

CHALLENGE

As a nonprofit organization with minimal staff but large goals and projects, making IT worry free is key. Time and attention needs to remain focused on the organization's mission and not on computer and printer issues.

SOLUTION

Keith and the Azure Horizons team deliver a Managed IT Services solution including proactive 24/7 monitoring and maintenance of their technology systems and access to support if and when the need arises. Keith also sources all needed IT equipment ensuring quality and performance are maintained while being mindful of budget limitations.

IMPACT

For Heidi, the single biggest benefit that Keith and the Azure Horizons team bring to the organization is availability. Keith quickly addresses any issue regardless if it's remotely or onsite. Heidi's previous experience with IT vendors who only operate remotely proved how challenging it can be to get IT problems resolved in a timely manner. Having a team that can come onsite, if needed, and quickly address an issue is important to Heidi.

Heidi and Unity Temple Restoration Foundation also benefit from Keith being reliable. She knows that Keith provides quality work at a very reasonable price. This allows UTRF to not have to worry about their IT and instead continue to deliver on the organization's mission.
